i-Ready Mid-Year Data

January 2023

## Typical Growth:

The average annual growth for a student at this grade and placement level.

Typical Growth allows you to see how a student is growing compared to average student growth at the same grade and baseline placement level.

The aim is to exceed 100% median progress toward Typical Growth by the end of the academic year.

According to i-Ready, after the mid-year diagnostic, those student groups showing **less than 50%** median progress to Typical Growth may need additional instructional support.
